

Indonesian School visit AEC College for Short Study Trip.

On 29 November 2010 – 1 December 2010, a group of students and teachers from Tuban, East Java-Indonesia had visited AEC College, to have an immersion programme with students of Government Preparatory Course Secondary 3.

The students joined Maths and English classes for 3 days and made friends with students from other countries. At the end of their visit, these Indonesian students even performed an Indonesian traditional dance for their friends. It is indeed an encounter filled with rich cultural exchange for both parties.

While the students were enjoying the culture diversity in the classroom, the teachers are learning about the Education System in Singapore with Ms. Natalia Sanusi. Besides some similarities they found in Singapore Education System, they also found some forms of teaching method that can be adapted and implemented in Indonesia to upgrade the quality of their education structure. The teachers were also given the opportunity to observe AEC College teachers in the classroom. It is very beneficial for the Indonesian teachers because they learnt new methods and approaches in teaching. Mr. Mark Bastick, a native teacher from Australia also shared his valuable experiences in teaching. The teachers gained useful knowledge and new experiences that they can incorporate back home.

We are really grateful for the friendly visit and we are looking forward to host similar programmes in our school.
