We are accredited by the Singapore Quality Class for Private Education Organisations, ISO 9007:2008 and CaseTrust.

Aims & Objectives

This Diploma aims to equip you with a broad range of Interactive Media production and design skills. You will gain an in-depth understanding of how multimedia and the Internet is transforming our lives and commerce everywhere. This programme has a strong commercial bias and is designed to move you seamlessly into the fast, exciting and highly rewarding interactive media industry.

What is Interactive Media?

"Interactive media is the integration of digital media including combinations of electronic text, graphics, moving images and sound into a structured, digital environment that allows us to interact with data for appropriate purposes." Digital environment includes the Internet, telecommunications, interactive digital televisions, advertising techniques, poster creation, 2D/3D animation, website development etc.

How is Interactive Media Developing?

Rising income and education levels, convergence of values, increasing diversity of ideas and the incessant quest to deliver customized information is powering the growth of the interactive media industry at an exponential rate. Huge opportunities are being created in its wake. Established companies are rushing to outdo each other through innovative applications of interactive media. Small companies headed by creative individuals are sprouting up everywhere with new ideas and products. Consequently demand for talented and interactive media savvy individuals is rising rapidly. The telling statistic is the rapid increase in enrolments at educational institutions across the world for interactive media courses.

So if you can dream it, you can probably build it.
